Learning Initiatives on Reforms for Network Economie

Context

- Complex tariff plans
- Difficult to compare meaningful tariffs across markets or across time
 - Useful for users, operators and regulators
- □ Price baskets
 - A technique to create <u>comparable user baskets</u> based on their actual profiles
 - Given a particular user; possible to compare "cheapest" or "most expensive" and any thing in between
- □ OECD price basket
 - T-Basket, since 1995

OECD

- Organization for Economic Co-operation and Development
 - Australia, Austria, Belgium, Canada, Czech Republic, Denmark, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Japan, Korea, Luxembourg, Mexico, Netherlands, New Zealand, Norway, Poland, Portugal, Slovak Republic, Spain, Sweden, Switzerland, Turkey, United Kingdom, USA

OECD mobile user basket

	Number of minutes per month, since Feb 2006	Old basket, October 2001
Voice, level of user		
Low User	30	25
Medium User	65	75
High User	140	150
SMS		
Low User	33	30
Medium User	50	35
High User	55	42

Source: OECD/Teligen

www.lirneasia.net

Working assumption

The OECD Medium = Reported average for IN, LK. OECD H:M:L ratio then applied to IN and LK

	M	C	*
	'		

	OECD	India	Sri Lanka
Voice, minutes of use per month			
Low User	30	86	92
Medium User	65	188*	200**
High User	140	404	430
SMS per month			
Low User	33	28	14
Medium User	50	42*	21**
High User	55	46	23

^{*}TRAI, September 2006, ** Operator

Mobile voice basket; weights

OECD weights for call destinations

Call made to	Low User	Medium User	High User
Local, Fixed Line	0.15	0.14	0.13
National, FL	0.07	0.07	0.07
On-net	0.48	0.48	0.47
Off-net	0.22	0.24	0.26
Voicemail	0.08	0.07	0.07
Total	1.00	1.00	1.00

w.lirneasia.net

Mobile voice basket 2; weights

OECD weights for time of day of call

Called during	Low User	Medium User	High User
Peak	0.48	0.50	0.60
Off-peak (OP)	0.25	0.24	0.19
Weekend (WE)	0.27	0.26	0.21
OP+WE	0.52	0.50	0.40
Total	1.00	1.00	1.00

Mobile voice basket 3; weights

□ OECD call durations (in minutes)

	Peak			Off-peak		
	L	Μ	Ι	L	М	I
Local/National	1.5	1.8	1.7	1.5	1.8	1.7
On-net	1.6	1.9	1.9	1.6	1.9	1.9
Off-net	1.4	1.7	1.8	1.4	1.7	1.8
Voicemail	0.8	0.8	0.8	0.8	0.8	0.8

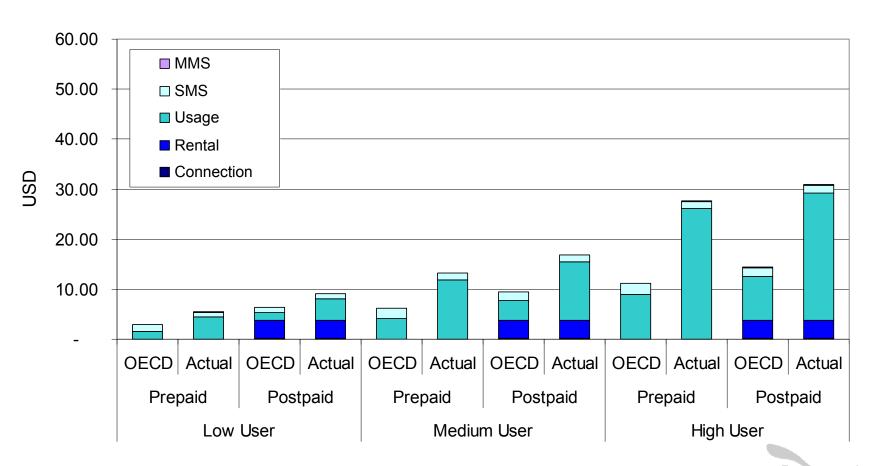

Price calculation

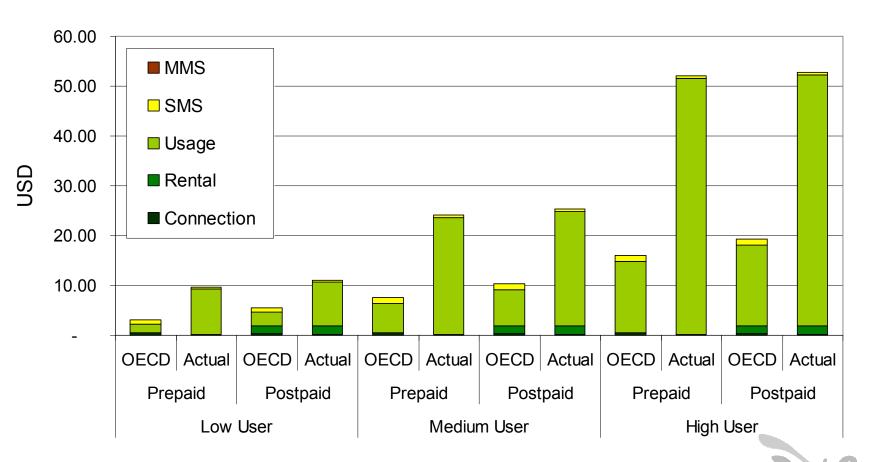

- ☐ Formula; for usage
 - User Level x Call made to x Called during x tariff x call duration
- Example
 - If, Low User x [On-Net x (price/min) x call duration] x [Off peak x (price/min) x call duration]
 - Then, 25 minutes x [0.48 x (price/min) x minutes] x [0.52 x (price/min) x minutes]

India Basket: OECD vs. Actual; USD

Sri Lanka: OECD vs. Actual; USD

ww.lirneasia.net

Data availability

- Where will the tariff data come from?
 - OECD: Teligen, commercial operation
 - Obtains from own master tariff database
 - Our region?
- What about
 - International calls and roaming
 - Business vs. residential
 - Packaged services

Basket calculation

- Regional
- country specific
 - Responsibility?
- A combined effort
 - Who will lead?
 - Cooperation of operators crucial
- □ Validity period?
- Many other issues...
